

HARLEQUIN

The world dances on Harlequin floors®

Harlequin Vitality Plus™

Harlequin Vitality Plus is a cost-effective, self-install sprung floor panel system, designed for permanent installation. Panels are laid in a brickwork fashion onto the sub-floor, so that cross joints do not coincide. The panels join together by a special tongue and groove, which are glued during installation.

Harlequin Vitality Plus can be installed by anyone with basic DIY skills and full instructions are provided. It's a cost-effective choice, helping to reduce the injury risks associated with dancing or performing on a hard, unsprung floor.

Harlequin Vitality Plus is finished by choosing an appropriate Harlequin vinyl performance floor from our range.

Specification guide

Permanent or Portable	Permanent
Floor panel sizes	2.25m x 1.125m
Minimum floor thickness (before inclusion of chosen finish)	37mm
Minimum floor weight (before inclusion of chosen finish)	30kg per board
